

Team Status Report #4

1. Goals From a Week Ago
 - a. Last week, our first goal was to finish our individual Software Engineering assignments. Our second goal was the complete Sprint 4 together on Thursday. The tasks were assigned to everyone.
2. Progress Made This Week
 - a. This week, we completed Sprint 4. In Sprint 4, we created our user story features and scenarios and updated our Project Tasks and Progress Trello board. We also completed our individual Software Engineering assignments. Last but not least, we met with the TA on Thursday and he graded our Sprint 3 with us.
3. Plans and Goals
 - a. Our plans for next week are to finish our individual Software Engineering assignments, as well as to complete Sprint 5 together once we meet as a group. We each will work on our individual parts of the website which we assigned earlier on.
4. Agenda for Meeting With Instructional Team
 - a. The TA we met with on March 18th told us that, during our instructional team meeting, we would discuss our past sprint assignments. During this time, he would grade the assignment with us and explain anything which we found to be confusing. Currently, we plan to meet this week and discuss Sprint 4. If we have any questions about Sprint 5, we plan to ask our questions during our meeting as well.
