

Individual Status Report 4

1. **Goals from last week:** Help define acceptance criteria as well as outline how our product will handle different ranges or types of data.
2. **Progress made this week:** I changed the Data Flow and Context Diagrams based on feedback. I was unable to complete Flask 5 due to a technical issue that, at the time of writing this report, I have not been able to find a fix for. Currently I am concerned about this because the feature I am to develop has to do with updating and deleting fields.
3. **Goals for next week:** Above all else, try to finish Flask 5! Once that's done I will start developing my part of the project.
