

Goals from last week

- Our plans were to finish our individual class assignments and complete Sprint 5 together once we meet as a group. We each will also start working on our individual parts of the website which were assigned earlier on.

Progress made this week

- This week, we all completed Sprint 5, which consisted of our base events app. For me this consisted of working on the html, css, and the edit function. I also worked on a lot more sections that required debugging or that some team members didn't do. We also completed our individual class assignments. Finally, we met with the TA on Thursday to discuss Sprint 4.

Plans and goals

- Our plans for next week are to complete Sprint 6 together and individually. We each will work on our individual parts of the website which we assigned earlier on. For me, this consists of adding capability to add images to events and making the app look nicer.
