

## Eric Baca - Personal Status Report #5

### 1. Goals from a Week Ago

- Complete flask assignments to continue project preparation. Continue converting flask\_app into event\_app and have base website functionality complete.

### 2. Progress Made This Week

- We completed Sprint 5. My role in sprint 5 was to help create the list event functionality, however because this functionality required the individual event edit functionality to be completed, I worked on various other parts of the project as some team members were busy and did not make many contributions to their parts of the overall project this week.

### 3. Plans and Goals

- Our plans for next week are to finish our individual Software Engineering assignments, as well as to complete Sprint 6 together once we meet as a group. We each will continue to work on our individual parts of the website which were assigned earlier on.

### 4. Agenda for Meeting with Instructional Team

- Meet this Thursday, April 22nd
- Discuss group project moving forward
