

Goals from last week

- Our plans were to finish our individual assignments for this class and complete sprint 3 together as a group.

Progress made this week

- This week, we completed Sprint 3. In this sprint, we created a data flow diagram and defined the models, attributes, types, and associations. We also updated our UI prototype with the URL, function, and view. We then updated our Trello board, and we completed our individual class assignments. Finally, we met with the TA on Thursday, and we went over Sprint 2 together.

Plans and goals

- Our plans for next week are to finish our individual assignments and complete Sprint 4 together when we meet as a group.
