Goals from a week ago
- No goals from a week ago

Progress made this week
- This week my team created a GitHub repository, a group Google Doc, and a Trello board. I created my own individual Trello account in order to access the Trello board, and I made sure I had access to the GitHub repository. The Trello board included four lists, which were for backlog, to do, doing, and done. All of us were assigned to two backlog assignments. Mine are to edit an event and to attach an image to an event. A list was also added with links for our group for easy access.

Plans and goals
- The plans for next week are to do all individual assignments for this class and to work on Sprint 2 assignments together as a group. We are still in the preparation phase of this assignment, so there isn't much detail about specific tasks as of now.
